

# PRODUCT INFORMATION

## SUPERSTRIP

pH:11.3  
Alkali

### Rinse Free Floor Stripper

FC30

Superstrip is our high power water-based floor stripper that removes metallised and non-metallised floor polish without the need for heavy scrubbing.

Its modern formula eliminates the need for the usual rinse and neutralisation process.

After dirty solution has been extracted the alkaline residue evaporates, eliminating problems with polish application and drastically reducing labour costs.

Ideal for use on PVC, thermoplastic, linoleum, rubber, sealed cork, sealed wood, marble and terrazzo.

Always test surface before use and brush floor.

Dilute as instructed and apply with trigger spray or mop. Allow 5-10 minutes contact time, agitate with scrubbing pad or mop and extract solution once stripped.

Designed for professional use.

### BENEFITS

- Rapidly removes heavy build-up of polish.
- Suitable for mop or machine application.
- Suitable for a variety of floor types.

### HOW TO USE

Always test surface before use and brush floor.  
Dilute as below and apply with trigger spray or mop.  
Allow 5-10 minutes contact time.

### PRODUCT SIZES

5 Litre
